

# family support project

## vehicle adaptation

### Objectives

- Travel using a vehicle adapted to the disability
- Promote independence and socialization
- Remain in employment
- Combat isolation

### Budget

From €3,500 to €13,000

### Duration

All year

### Description

Types of projects co-financed :

- Adaptation of the driver's seat with steering wheel controls (€3,500)
- Additional cost of installing an automatic gearbox (€6,000)
- Installation of a lifting platform (€6,000)
- Installation of a swivel car seat (€6,200)
- Disbursement and installation of manual PRM access ramps (€7,000)
- Disbursement and installation of electric PRM access ramps (€13,000)

### Impacts

People with a leukodystrophy benefit from transportation tailored to their disabilities, enabling them to carry out everyday activities such as going to medical and paramedical appointments, working, shopping, going on vacation, and attending leisure or cultural events. Access to activities and social ties are maintained and restored.
